

<b>Name</b>	<b>Division</b>	<b>Subject</b>
Kim Young Chang		Feasibility of 50nm optical lithography
Lai Xiaoling		
Lakshmanan Balasubramanian	Desics	Analysis and design techniques for reduced switching noise in single-package transceivers
Li Dagang		Design of a scalable Physical Layer for Wireless Personal Area Networks
Liu Jian		Mult-antenna transceiver front-ends for digital telecom applications
Ma Zhe	Desics	Run-time exploration of platform-dependent system-level mapping methods
Sibaja-Hernan Dez Arturo	STDI	Optimization of the RF performance of SiGeC HBT's of BiCMOS Technologies
Zhang Wenqi	SPT	Evaluation of seed layers for Cu BEOL processing
Zhou Cheng	MCP
